Target **about 440g**

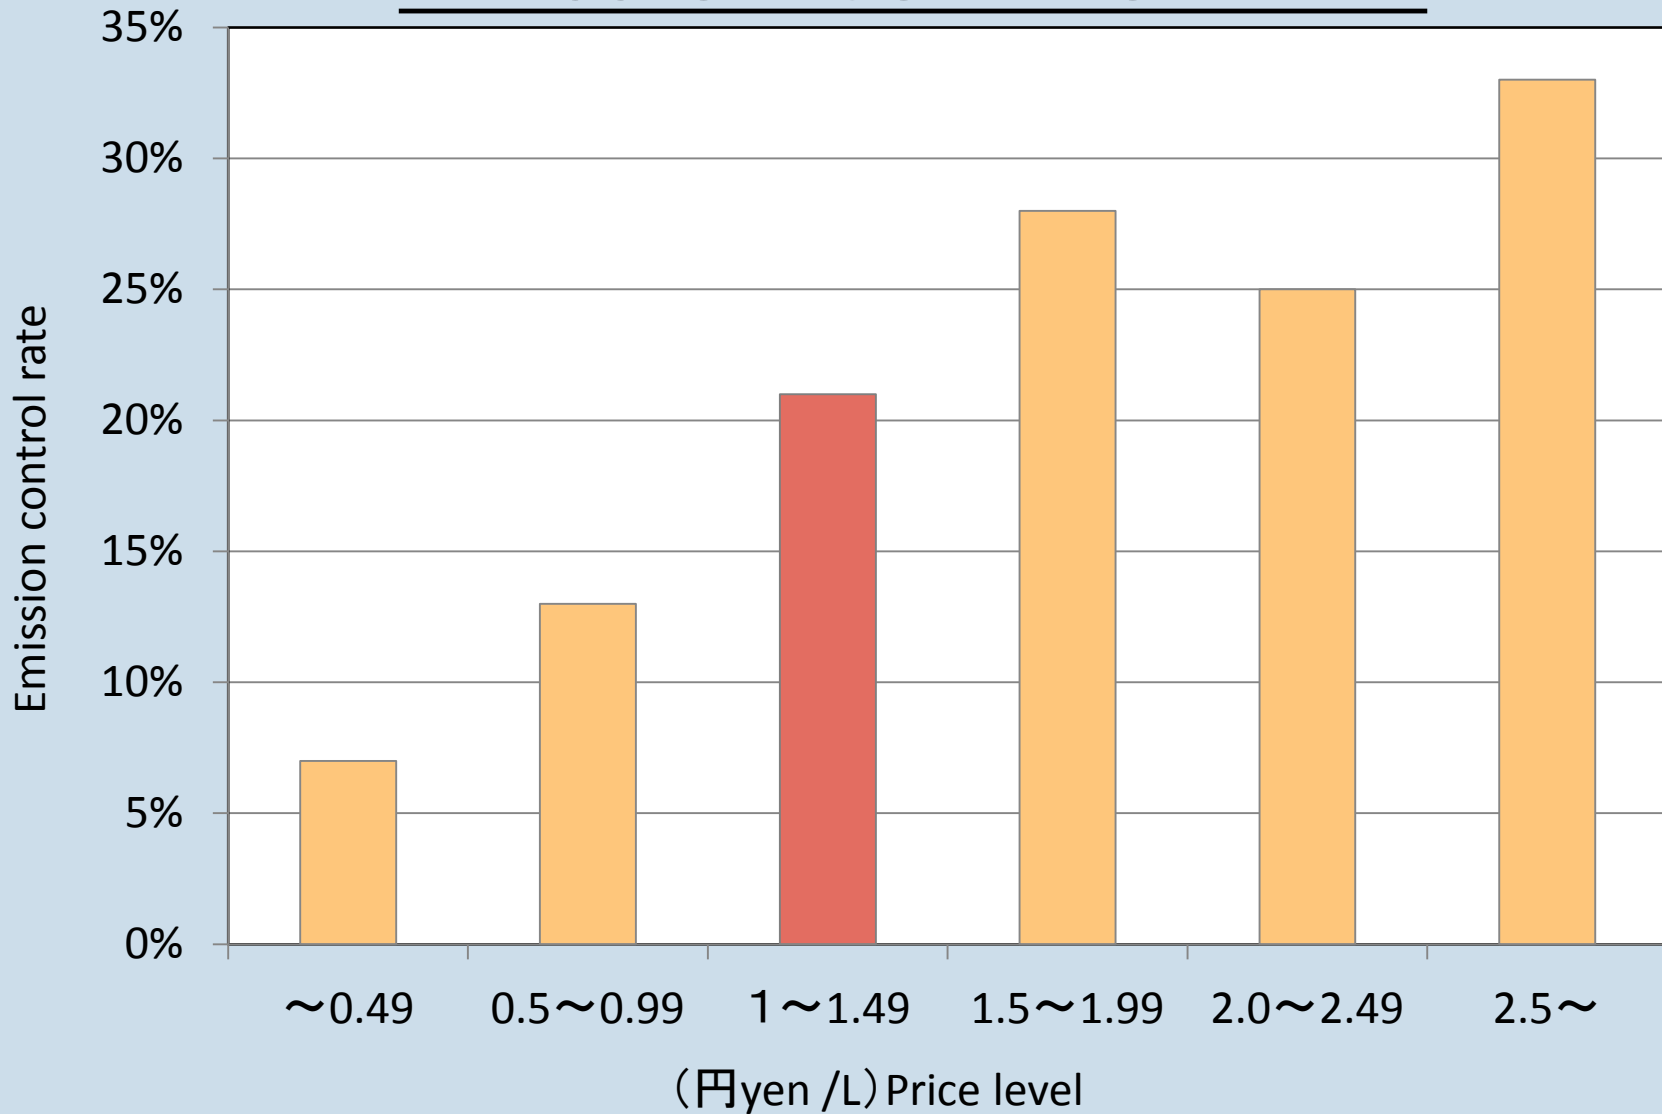

Higashiura Town Year 2016 (Heisei 28 nendo) result **528g**

In case that the quantity of household waste decreased in 20 percent

< Quantity of waste once in a day for 1 person. >

# BURNABLE WASTE FEE AND WASTE EMISSION CONTROL RATE

source: 一般廃棄物処理有料化の手引き(環境省)

- 「Price of handling charge and emission control rate」
- 「Condition of waste disposal charge in the near city or town. 」

The waste disposal charge for 1 liter of garbage bag is ¥1.

SIZE	waste disposal charge
L(45ℓ)	¥ 45
M(30ℓ)	¥ 30
S(20ℓ)	¥ 20

# Regarding the burden of household.

<If 2 pieces of 45 (L) garbage bag will be used in a week.>

	amount	week	amount	annual total	monthly total
before charge	¥ 10	52 week	¥ 1,040	-	-
after charge	¥ 45	52 week	¥ 4,680	+ ¥ 3,640	+ ¥ 304

# REGARDING THE PRESENT

## GARBAGE BAG

The present garbage bag (translucent blue)  
cannot be able to use anymore from April 1, 2019 for  
burnable waste.

Please purchase a new garbage bag.

However, plastic bags for [containers and packaging made of plastic]  
are possible to use even after April 1, 2019.

### **【IN CASE THAT GARBAGE BAGS WAS LEFT AND NOT USED】**

The garbage bag [translucent blue] that was not used are  
planned to be purchase by the town after April 1, 2019.  
Information about this will be announced after the decision  
was made.

# REGARDING THE SELLING OF THE NEW SPECIFIED GARBAGE BAG

**Period of selling of specified garbage bag .**

Starting from February,2019.

**Place where you can purchase the garbage bag.**

You can buy the specified garbage bag from the designated stores. After the decision was made, we will inform about this at the town home page etc.

translucent white

# WASTE THAT ARE NOT QUALIFIED FOR WASTE DISPOSAL CHARGE

## (1)diaper

Put the diaper in a transparent plastic bag or semi transparent plastic bag. Use a marker for writing the word [kami omutsu] on it then dispose it at the at “gomi station” .

# WASTE THAT ARE NOT QUALIFIED FOR WASTE DISPOSAL CHARGE

## (2) Voluntary Cleaners of “gomi station”

Will be offered to community members of the town or registered volunteer groups.

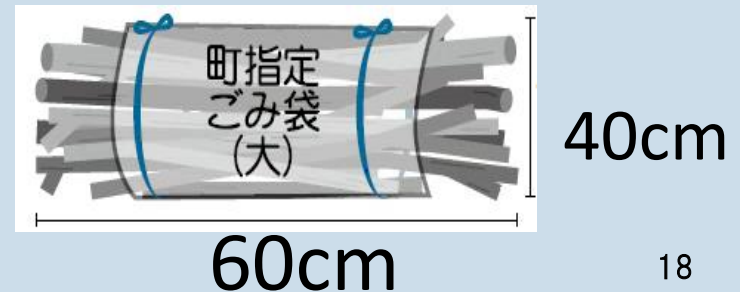

# CHANGES ON HOW TO THROW THE WASTE ①

## Ways on how to throw “branches” at gomi station.

Put the branches inside the specified garbage bag.  
The width must be 5cm.

[In case that it is difficult to put the branches inside  
the garbage bag.]

The length must be 60cm and the width is less 40cm.  
Tighten it together with a large size  
of garbage bag.

# CHANGES ON HOW TO THROW THE WASTE ②

## Ways on how to throw “futon”

Put the futon in a specified garbage bag and throw.

[In case that it is difficult to put in the specified garbage bag]

Fold it one by one, tighten together with a large size of specified garbage bag.

# REGARDING THE REDUCING OF WASTE

## REDUCE

To live without waste and reduce.

## REUSE

To reuse things without throwing it away if it still can be use.

## RECYCLE

For the effective use of limited resource waste and use as materials again.

# REDUCE

## ~REGARDING FOOD LOSS~

Food loss is food that is discarded or lost uneaten.

In Japan, one person is wasting a bowl of food everyday.

[ ① [Do not buy too much] , [use all] ,[eat all] .

[ ② [Learn the difference of [Expiration Date]  
and [Best Before/ Sell by date] .

SHOUHIKIGEN- EXPIRATION DATE	SHOUMIKIGEN –BEST BEFORE
<p>Product that is easy of deteriorating in quality. This is a period that you can safety eat the food. It is safe if you will not eat the food that was already expired on date. Like lunch box–bentou, sandwiches, cake etc.</p>	<p>This indicates when the product is the freshness. It does not mean that product that passed sell-by date cannot be eaten. It is still safe to eat like, snack, cup noodles etc.</p>

## REDUCE

### ～REDUCING OF “NAMA GOMI” RAW GARBAGE～

30 percent of burnable waste come from the household’s “nama gomi” raw garbage.

Reducing the “nama gomi- raw garbage ” can help the waste easily to burn. ASPA is possible for composting of raw garbage.

## REDUCE

### ～REDUCING THE QUANTITY OF BRANCHES～

In the town of Higashiura, a branch crusher (cutting machine) is implemented and free to borrow for recycling brunches of trees. These brunches will be cut into pieces, can spread it in the garden and effective in reducing dust.

## ～ECO ACTIVITY～

### REUSE

- ① Let's use free market or recycle shop.
- ② It is better if we will use refillable things.

Example: shampoo, detergent soap, ink

### REDUCE

Refrain from using disposable goods.

Example: paper plate, paper cup

### RECYCLE

## ～WASTE EDIBLE OIL～

Each community center and shuukaijyou are implementing the collection of waste edible oil (except Fujie area) .

Edible oil must be hardened and thrown away as combustible waste.

But please cooperate in the expansion of resource collection in a separate collection.

## RECYCLE

## ~BURNABLE WASTE THAT IS EASY TO THROW~

Envelope, memo pad, notebook etc

20 percent of possible recycled waste are mixed in burnable waste.

Put the small paper and paper bags together in an envelope and easy to throw as a type of magazine or information magazine.

✕ Packages with a color of silver, water proof made (paper cup, ice cream cup etc.) , carbon paper (home delivery voucher etc.) , thermal paper (receipt etc.) and photos can be thrown as burnable waste.

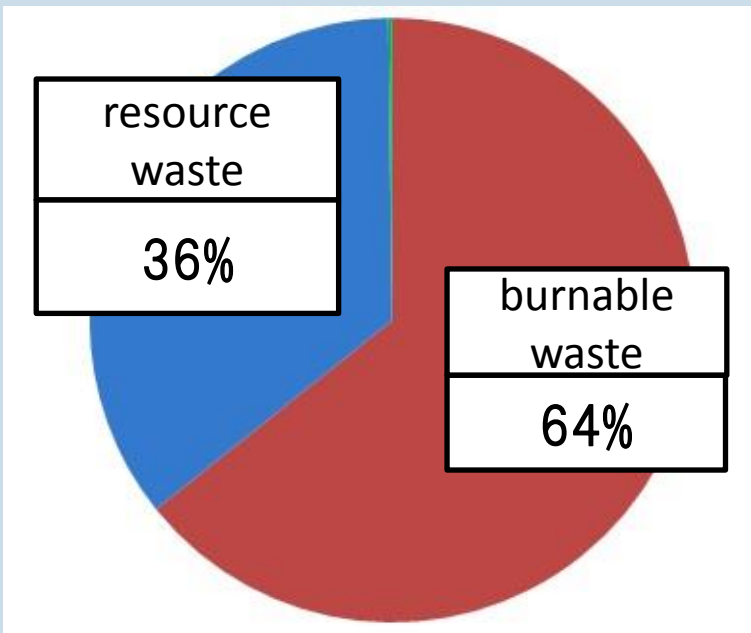

# RESOURCE WASTE IN BURNABLE WASTE

In the year 2017 month of May, we surveyed the contents inside the household burnable waste. The result was 30 percent of resource waste like [plastic containers, packaging, paper] was mixed to burnable waste.

< resource waste ratio >

< Ratio of all garbage. >

item	Papers	Containers and packaging made of plastic
ratio (%)	45	38

item	Clothes	Bottles	Plastic bottles	metals
ratio (%)	8	6	2	1

# RECYCLE

## ~HOW TO THROW THE SMALL ELECTRIC APPLIANCES~

[TOUSHI KOZAN KARA TSUKURU ! MINNA NO METAL PROJECT]

From the month of September, 2017 collection of small electric appliances was implemented with a purpose of producing medals for the Tokyo Olympic / Paralympic 2020.

[PLACE ]:

Town Office main building 1<sup>st</sup> floor , each area of Community Center ,  
Moriokadai Shuukaikjyo, Higashigaoka Shuukaijyo, Ken Ei Higashiura Juutaku Shuukaijyo,  
Ishihama Naka Shuukaijyo .

[Possible things for collection]:

Small electric appliances with the size of 1cm in length 15cm × 40cm in width.  
Things that is possible to insert in the inlet.

Example : computer , extension cord , remote control , car navigation , video recorder, audio recorder, fax, music player , mobile phone , iron, hair drier etc.

## RECYCLE

## ~ Feather futon ~

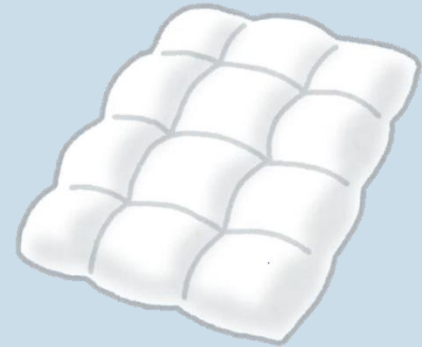

Will be collected as recyclable waste from the month of January, 2019 .

The place of collection is located at “jousetsu shigen station” of the town office.

### 【What to collect】

Down rate are more than 50 percent of feather futon.

Regarding the feather futon, confirm the quality indication and dispose.

❌ Other than down rate below 50 percent, with dirt, cotton futon, feather futon, futon (down jacket) are not possible for collection.

# Influence of typhoon

Collection day might be changed on the year-end, New Year holidays, and bad weather day, so please check the public information, etc.

# REGARDING THE ENTERPRISE WASTE

Only the household waste can be collected. Waste from the enterprise is not possible for collection and must not be thrown at the “gomi station” of the area.

< PROCEDURE ON HOW TO THROW THE GARBAGE  
(FROM ENTERPRISE) >

- ① Directly bring the garbage at Tobu Chita Clean Center.
- ② Request the town licensor for collection of waste.

# To reduce waste.

If you throw it away, garbage .If you separate it, resource.

Use this as a watch word and we are asking for your cooperation in separation and reducing of waste.

Please follow the rules of house combustible waste disposal charge. We are sorry for the inconvenience and hoping for your nice cooperation and understanding.
