

# 於大公園 根

東浦は愛知県内で唯一のオニバス生育地です。於大公園のオニバス池で見ることができます。オニバスは、トゲの多い巨大な水草で、葉の直径は30cmから大きいものは2mにも！

**Odai Park (Prickly Water Lily)**  
Higashiura is the only growing place of "Onibusu" (prickly water lily) inside the Aichi Prefecture and may find this at Odai Park Onibusu Lake. Prickly Water Lily is a thorny water grass. The leaves grow from 30cm in diameter up to 2 meters in length!

## 高根の森

自然と触れ合える、極めて自然に近い森林レクリエーションの森。約5.2haの森林の中で自然の四季を体感しませんか。

**Takane-no-Mori Forrest**  
This forest is a place where people interact with nature and enjoy highly accessible forest recreation. Visitors are able to enjoy nature's four seasons in this about 5.2 hectare forest preserve.

## 自然環境学習の森

里地里山として自然環境の保全を図るとともに、楽しみながら自然と触れ合い、人と自然の関係を学ぶ場です。

**Natural Environment Learning Forest**  
While planning both conservation of natural environment and enjoy closeness with nature, this is the place to learn relation of human and nature.

## 四季を彩る 東浦の花

Colorful 4 Seasons  
Higashiura Flower

ウノハナ

正式名はウツギ。可憐な白い花は「卯の花」と呼ばれ親しまれていますが、昔は木釘を作ったほど強い木です。東浦町の花に指定。

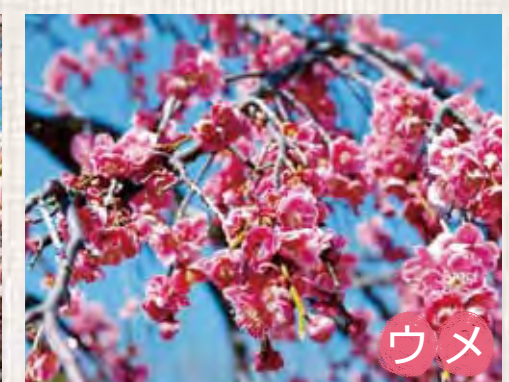

**Deutzia**  
While its official name is "Utsugi" in Japanese, this delicate white flower is most commonly known as "Unohana". It is a strong tree, and was actually used for wooden pegs in the past. It is the official flower of Higashiura.

八重桜

花びらの枚数が非常に多く、八重咲きになる桜の総称。ソメイヨシノなどに比べて開花が1〜2週間ほど遅いため、毎年於大まつりの時期に大変美しく咲き誇ります。

**Double flowered cherry blossom**  
The numbers of petals are plenty and this double flowered cherry's generic name is "yaezakura". The blooming of the flowers is 1-2 weeks late comparing to "someiyoshino" and others. Because of this, every year when the season of Odai Festival comes the cherry blossoms are amazingly beautiful.

ウメ

於大公園梅見の丘で見ることができます。白か淡紅色の花を2〜3月に咲かせます。心地よい香りが春の訪れを感じさせます。

**Plum**  
We may see it on Umemi-no-Oka in Odai Park. The white or reddish blossoms appear in February and March. The wonderful aroma makes visitors to feel the coming of spring.
